

Riverbend Gastroenterology — Scheduling Rules

These are the scheduling notes the practice handed us, lightly cleaned up. They are written the way a front-desk lead would write them — so they're uneven, occasionally vague, and in a couple of places they don't fully agree with each other. That's normal. Part of the job is deciding what to do where they don't tell you.

The practice

- **Specialty:** Gastroenterology
- **Locations:** Maple Grove, Lakeside
- **Providers**
 - **Dr. Alan Whitfield, MD** — paired with **Nina Brooks, NP**
 - **Dr. Priya Raman, MD** — paired with **Marco Ellis, PA**
 - **Dr. Theodore Crane, MD** — paired with **Sofia Mendez, NP**

The rules

1. **Follow-Up patients** are patients who have been seen within the last 3 years. **New Patients** are patients who are either new to the practice OR have not been seen in more than 3 years.
2. New Patient visits are **30 minutes**. Follow-Up visits are **15 minutes**.
3. The patient must have **active insurance** and have their **insurance card / policy number** with them when the appointment is made. If the insurance isn't active, or they don't have the policy number, the appointment can't be made.
4. We do **not** see patients **under 18**.
5. Patients see **their own provider** for follow-ups (that provider, or the provider's paired NP/PA). If a patient wants to switch to a **different** provider, that needs **approval** from the office first — don't just move them over.
6. **Dr. Crane only sees office patients on Thursdays**. On any other day, his office patients are seen by his NP, **Sofia Mendez**. If a patient really insists on seeing Dr. Crane himself, they can only be booked on a **Thursday**.
7. Always offer the patient the **soonest** available appointment.
8. Do **not** book a patient who has a "**Discharged from Practice**" flag on their chart.
9. **Annual wellness / physical visits** — the practice wants to start offering these but hasn't told us yet which providers do them or how they should be scheduled. *[TBD — let's discuss]*

Transfers & escalation

- **Urgent medical concerns** (severe symptoms, anything that needs clinical judgment, or a possible emergency) — do **not** give medical advice. Transfer to the **nurse line / medical professional**. For a clear emergency, tell the caller to hang up and dial 911.
- **Front desk** — transfer here when the caller asks to speak to a person, or when the request is something the agent can't handle (e.g., billing, the "annual physical" case above, or an unrecognized request).
- Phone numbers for both are in the sample data.

Riverbend Gastroenterology — Sample Data

Use these records to build and test your agent. There's no live backend and you don't need one — have your tools return **canned data** from this set (a static-response function, or simulated in your prompt/flow). No hosting or tunneling required; wiring a real stub for live verifiability is an optional bonus. We're evaluating the agent and your thinking, not your plumbing.

Phone numbers with "has an upcoming appointment" are the ones to use for reschedule/cancel testing (the same pattern an FDE gets). You decide what the existing appointment looks like.
